THE WOOD CONSTRUCTION AND
GLULAM LEADER • www.mathis.eu

KNOW-HOW

Since almost 150 years, Mathis develops its know-how in the field of wood construction. Recognized for our competence and the quality of our products in Glulam structures, timber framing, structural panels, as well as mixed constructive systems wood/concrete or wood/steel.

Our project managers will assist you from the beginning to the end of your project.

Architect: J.C. Baudry

TEACHING - EDUCATION

Recognized builder in the education and training sector, MATHIS builds wood schools, covered playgrounds, universities, and libraries.

Our big expertise in wood construction allows us to propose you constructive solutions “all wood” in Glulam structures, timber framing and structural panels (CLT) but also mixed solutions wood/concrete or wood/steel.

BUSINESS

MATHIS wood systems : a new way of building for offices, industrial, retail, logistics and other types of business buildings.

Our building components and systems are perfectly adapted to all requirements, and more specifically, for fire resistance and chemical agents.

Today, MATHIS is working all over the world, on all types of projects, offering short lead times, low prices and quality.

3: Colmar (France)
Architect: Kautz Architects

4: Saint-Martin-d'Hères (France)
Architect: Groupe Aude

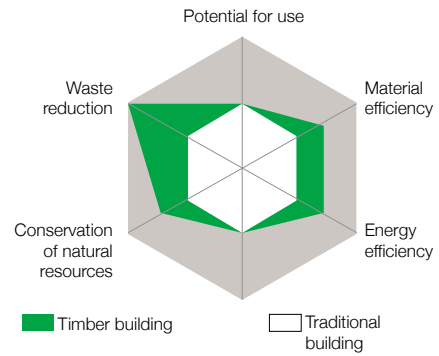

ENVIRONMENT

Installed in a region very attentive to ecology, MATHIS has committed with conviction to the crucial concept of nature conservation.

The only renewable building material, wood also contributes to sustainable development by carbon storage.

ECO CAPABILITY RADAR

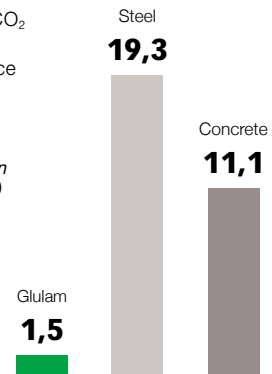

MATHIS wood systems underwent two **favorable life cycle assessments**, carried out by the sustainability environmental consultant ECOBILAN, CTBA and the ADEME, the French agency for environment and energycontrol.

CO₂ EMISSIONS

RESULTING FROM MANUFACTURING OF VARIOUS MATERIALS

Kilogrammes of CO₂ per square meter of residential space (not including recycling).

(Swedish Federation of Forest Industries)

- 1: Soufflenheim (France)
Architect: Weber Keiling Architects
- 2: Baie de Somme (France)
Architect: Mader

COMPONENTS AND SYSTEMS

Since 140 years, Mathis innovates. Leader in wood building and Glulam structures, we offer new concepts to bring your projects to reality.

MATHIS products are economical, ecological, consuming low power and quick and easy to install. We are state of the art in terms of innovation and design, meeting all requirements from the simplest to the most complex projects.

Innovative products that are technically state of the art

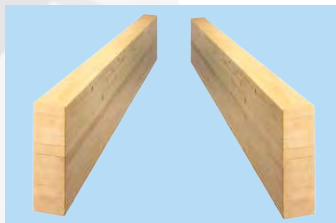

ÉCOLAM[®]

Ecological glued laminated timber

ACERLAM[®]

All-purpose glued laminated timber

REDLAM[®]

Glued laminated timber with character

COLORLAM[®]

Glued laminated timber full of life

DALBOIS

Panel for wall, roof and floor

PROFILES

More than 20 types
(from 41 x 127 mm up to 840 x 2,046 mm)

AZUREL

High-performance wood panels

SNM

The wood system for floor and wall

TRADITION & INNOVATION

Since 1875, **MATHIS** has been passing from generation to generation its passion for wood and a sense of tradition to its customers for wood high-quality construction.

MATHIS considers human and innovation being as key elements at the heart of its development.
