

Construct Differently in Wood with MATHIS

MATHIS is a market leader in wooden constructions and structures offering a wide range of high performing and innovative wood systems like glued laminated and wooden framework. MATHIS is the perfect partner for every project involving wood, such as public buildings, industrial buildings, offices, sports and recreation centers, infrastructures, etc.

European Leader, MATHIS is a family business and has an experience in working with timber that goes back to the 19th century. Its factory is one of the most modern and competitive in Europe. MATHIS's success is based on the know-how of its engineers who manage each project from A to Z. They offer adapted solutions to each project, in collaboration with the architect and manage the whole building site. The company's quality process led the company ahead of the construction standards.

MATHIS is present all over the world, from the Middle East to Europe, Africa, North America, China and develops many projects, in particular in the Middle East since 1984: public buildings in Lebanon, grandstand in Jeddah, big sulphur storage hangar in Abu Dhabi, the King Khaled Airport Royal terminal in Riyadh or projects for important private customers.

Actual big interest in green constructions in the Middle East and worldwide as well as MATHIS's know-how, espe-
